

Fawoo Monthly Product Information Release-SEP 2008

Customized Shapes / Sizes - LED Light Panels

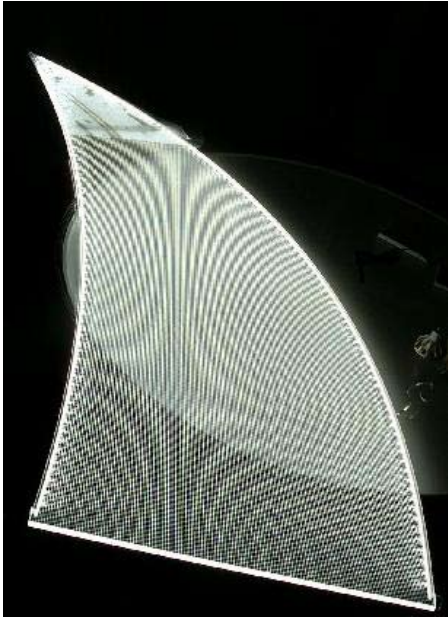

Figure 1 - Claw

Fawoo Canada Inc. introduces “Customized Shapes / Sizes LED Light Panels”. The Fawoo LED Light Panels can be custom cut to produce almost any shape and size for almost any application imaginable and customer requirement. Now you have the flexibility to be more creative and to think outside of the “Box”. (See Figure 1 - Claw)

Fawoo clients can offer their customers customized sizes and shapes. This unique ability places Fawoo at the forefront of the LED Panel industry. Architects and Marketing agencies now will have the flexibility to be even more creative with their concepts and designs for unique client requirements, spaces availability - for retail menu boards and shelving, customized lighting and logos. If you can't make that conventional lighting fit, use a Fawoo customized shape to create the required illumination.

Panel Information: Thickness of only 8mm or 4mm smaller applications, LEDs on Single Side / Double Sides / All Sides, Maximum Size is 4' x 8' sheets.

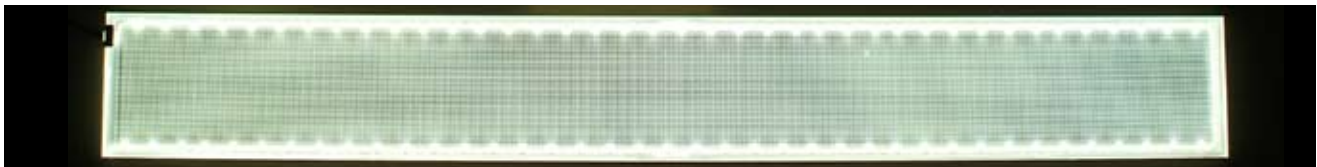

Figure 2 - Kick Plates

LED Light Panels are designed to optimize the light distribution over the entire panel while maximizing the surface brightness to more than 2,000 LUX. The first panel shown (Figure 1 - Claw) is one of 21 - 4' x 6' (approx.) custom cut panel shelves that will be custom installed in an Art Museum in the United States.

With the manufacturing plant located in Markham, Ontario, Fawoo Canada provides customers with fast delivery of any customized size panel, local customer support, and our standard 2 years product warranty.
